

MARCUS HANSEN

Customer Success | GTM Engineer

Waseca, MN | 507.201.7442 | Marcush1802hansen@gmail.com | hansenwebservices.com

SUMMARY

Client success professional combining end to end ownership of the customer relationship with the technical ability to build the systems behind it. Leads discovery, onboarding, and implementation, then drives adoption as the primary point of contact. Brings GTM automation experience and two years running a high volume support operation. Organized, clear communicator, quick to master new platforms.

CORE SKILLS

Customer Success and Client Relationships Owning the relationship end to end, discovery and needs analysis, onboarding through ongoing partnership, driving adoption, resolving issues and escalations

GTM Systems and Automation AI automation with the Claude API, multi agent systems, workflow automation, data pipelines, API integrations, internal tooling

Implementation and Onboarding Leading client onboarding and implementation, configuring platforms to fit client workflows, developing and delivering user training, coordinating cross functional teams through go live

Product and Technical Fluency Mastering new software quickly, Python and TypeScript, REST APIs, PostgreSQL, AWS, becoming the resident product expert

EXPERIENCE

COFOUNDER & CLIENT SUCCESS LEAD

Admin Ambassadors | 2026 to Present

Cofounded an AI consulting firm and own the client relationship end to end. Lead discovery to understand each client's goals, run onboarding and implementation, and drive adoption of the solutions delivered, serving as the primary point of contact throughout. Turn single engagements into ongoing partnerships by delivering measurable outcomes and staying close to each account, coordinating across stakeholders and acting as the trusted advisor clients rely on.

GTM ENGINEER

BS&Co | 2026

Built the automation systems that powered GTM at a marketing agency. Shipped AI driven tools for content generation, campaign scheduling, and data classification that drove marketing and sales operations, including a three agent system that produces validated email copy and a campaign calendar that integrates multiple data sources to auto generate optimized monthly marketing schedules. Partnered cross functionally with marketing, operations, and leadership to turn go to market goals into shipped systems, and executed SEO and AEO work to grow inbound.

SUPPORT OPERATIONS SPECIALIST

Sanford Bemidji Medical Center | 2022 to 2024

Served as the central coordination point in a fast paced, high volume operation, triaging and routing a constant stream of incoming requests to the right people and tracking each one through to resolution. Kept records and information accurate across multiple systems and communication clear between many stakeholders at once. Built the process discipline, attention to detail, and composure under pressure that keep a support operation running smoothly.

EDUCATION AND CERTIFICATIONS

Bachelor of Science, Exercise Science Bemidji State University, 2024

NCAA Division II Football | NSIC Defensive Player of the Year | AP All American

Salesforce Administrator (in progress) | AWS Certified AI Practitioner (2026) | Claude Code in Action, Anthropic (2026)
