SUMMARY

Self-taught AI engineer and full-stack developer building production LLM systems. Co-founded an AI consulting firm and ships multi-agent architectures, RAG pipelines, and AWS cloud infrastructure for paying clients. AWS Certified AI Practitioner. Moves from concept to deployed production code within days.

TECHNICAL SKILLS

AI & LLM: Claude API (Anthropic), AWS Bedrock, multi-agent architectures, RAG with embeddings and vector search, prompt engineering, NLP classification, MCP

Languages: Python, TypeScript, JavaScript, React, Next.js, HTML/CSS, SQL

Backend & Data: REST API design, PostgreSQL, pgvector, data pipeline development, OAuth 2.0/2.1, webhooks

Cloud & DevOps: AWS (Lambda, RDS, Bedrock, S3, EC2), Terraform, Docker, Git/GitHub, CI/CD

EXPERIENCE

Co-Founder & Lead AI Engineer

Admin Ambassadors | January 2026 – Present

Co-founded an AI consulting firm building AI automations for paying clients. Runs discovery with clients, identifies high-value automation opportunities, and translates business needs into shipped AI solutions. Delivered a paid enterprise engagement: a daily clone of a production database into AWS RDS with a governed, read-only Bedrock and MCP AI query layer that lets nontechnical staff query live business data in plain language. Also shipped a QR code shop floor time tracker used daily in the client's lab. Python, AWS (Lambda, RDS, Bedrock), Terraform, OAuth 2.1, pgvector semantic search.

Full Stack Developer

BS&Co | January 2026 – May 2026

Built AI-powered automation workflows using the Claude API for content generation, data classification, and process automation. Architected and shipped a three-agent AI system coordinating multiple LLM calls with structured prompts and classification logic, plus a campaign calendar tool that integrates three data sources, queries Postgres, and auto-generates monthly schedules from performance data. Built RAG pipelines with embeddings and vector search and designed REST APIs connecting AI systems to enterprise services. Both flagship systems run in production daily.

Support Operations Specialist

Sanford Bemidji Medical Center | 2022 – 2024

Served as the central coordination point in a fast-paced, high-volume operation, triaging and routing a constant stream of incoming requests to the right people and tracking each one through to resolution. Kept records and information accurate across multiple systems and communication clear between many stakeholders at once.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Exercise Science Bemidji State University, 2024

NCAA Division II Football: NSIC Defensive Player of the Year, AP All-American Selection

AWS Certified AI Practitioner Amazon Web Services, 2026

Claude Code in Action Anthropic, 2026
